

# The Room 10 Scoop

Volume 2, Issue 5

May 2022

## Room 10 Science Guys

Reported by Josh

For our May science experiment, Room 10 used flashlights to project drawings onto the walls and floor. We took a toilet paper roll and used a rubber band to cover one end of the roll with plastic wrap. Next, we chose a shape to draw on the plastic wrap. We turned off the lights in the room and each took a turn to shine the flashlight from the other end of the toilet paper roll through the plastic wrap and we saw the projection of our shape!

## What has Room 10 been up to in group?

### *Places in the Community*

**Reported by: Conor**

This month we refreshed fast food restaurants. Fast food is when you are looking for a casual meal, typically coming in disposable containers. If you wish to take it home, you can ask for it to-go. But if you do eat in the restaurant, make sure to put your tray on top of the trash cans when you are finished.

### *Vocational Group*

**Reported by: Ryan**

This month we learned about brick masons. A brick mason builds structures and uses mortar to hold them together. They work when the sun is out, not in the rain. To be a brick mason you must have the skill of lifting heavy objects.

### *Fun and Games*

**Reported by: Liam**

We refreshed our skills in Uno. In Uno, you can play a card that either has the same number or same color. When you only have one card left, you say "Uno!". The player that gets rid of all of their cards first, wins.

## **In the Spotlight**

*Our Latest and Greatest Accomplishments!*

### **CONOR**

Conor wants to celebrate his new self determination goal, composting! We keep a bin for compost in the classroom, and Conor will put it on the cart and take it outside to our composter.

### **LIAM**

Liam wants to celebrate his new work trial at Valley View Service! He has done some planting, washing windows, raking, as well as stacking tires. He has his own uniform that he puts on before every work shift.

### **JOSH**

Josh would like to celebrate going on outings in Johnston. He's been enjoying exploring the town, finding his favorite stores, cafes, and parks.

### **RYAN**

Ryan has chosen a self determination goal of picking up trash. He wants to help keep our environment clean, so he started already by using a trash picker and collecting garbage in parking lots to be thrown away.

### **JUSTIN**

Justin wants to celebrate visiting the Warwick library. He has been practicing his leisure skills by browsing some books and enjoying the quiet atmosphere.

### **KYLE**

Kyle wants to celebrate going to the park. He has gone for leisure time with Room 10. Kyle enjoys walking the sidewalk in the playground area and going on the swings.

**Room 10 is doing great things, and we are so proud of everyone's hard work!**

## Room 10- out on the town!

*Just one of our many class outings*

An exciting May outing for Room 10 was a visit to the farmer's market! We walked around and looked at all the vendors. The week we went was nurse appreciation, so we bought plants for our school nurses and delivered them when we returned back to school.

Stay tuned to hear about more of our outings!

## In the kitchen with Room 10!

Reported by: Justin

In honor of Cinco de Mayo, we made salsa! We went to Stop & Shop for tomatoes, cucumbers, and green bell peppers. Once they were chopped, we added each into a food processor until blended. We all took turns adding ingredients and pressing the button to blend. Once the salsa was finished, we got to taste it with some tortilla chips on the side for dipping.
